A brief guide to our markers follows:

01 | PEN COLLECTION REGULAR EDITION

Mirage

Marcel Duchamp was a French artist who challenged the conventional notions of art and aesthetics. He once said: "The beauty of the Mirage is that it is not a deception." He meant that a mirage is not a false image, but a real phenomenon that results from the refraction of light in the atmosphere. He admired the mirage for its ability to create unexpected and surprising effects, just like his own artworks. This pen captures Duchamp's vision in its iridescent resins that refract the light passing through it to create a unique writing experience.

Mirage Mythos

Greek mythology teaches that the Olympian gods are immortal beings, governing the life and death of human beings. The collection is crafted in acrylic resin enhanced with gold powder and vibrant colors corresponding each to a specific divinity. This is a new Mirage, with innovations that distinguish it at first glance from the basic model, such as the large nib, the central section made of brass instead of resin, most importantly, the central ring, engraved with Mythos and a "V" that symbolizes Mount Olympus.

Michelangelo

With this collection, Visconti honors one of the greatest masters in the history of art: Michelangelo Buonarroti. A symbolic figure of the Italian Renaissance, he was able to blend painting, sculpture, architecture, and poetry into a unique, absolute, and universal language.

The three color variations are inspired by the brilliant hues that Michelangelo masterfully used in his most iconic frescoes.

Comedia

The Comedia collection is Visconti's homage to the literary genius of Dante Alighieri, born in 1265 in Florence and regarded as the greatest Italian poet who has ever lived. The collection is named after Dante's most important work "Comedia", later known as the *Divina Commedia* (Divine Comedy).

Available in three different shades inspired by the canticles of the Comedia: Inferno, Purgatorio and Paradiso.

Van Gogh

Thanks to the technical know-how of our craftsmen, Visconti has created a series of pens dedicated to the artist's most famous paintings, such as Sunflower, Starry night and Portrait. These pens are made of high-quality resin with 18 facets that reflect the colors and textures of Van Gogh's opulent brushstrokes. They come in beautiful boxes illustrated with his paintings and include special inks that match the pen's color and bookmarks that feature the work of art. Visconti Van Gogh pens are not only writing instruments, but also works of art that capture the emotion and beauty of the artist's vision.

Alfred Hitchcock

The Alfred Hitchcock collection is a refined tribute to the vision of the iconic director, to his unmistakable visual language, and to his ability to tell stories that remain etched in our collective memory.

The design recalls the aesthetic codes of the 1960s, with a glossy black resin body enhanced by palladium details that create a sophisticated black-and-white contrast, evoking the visual poetics of Hitchcock's films. On the cap, an enameled reproduction of his signature celebrates his role as director and storyteller, while the specially designed band features both the Visconti logo and the Maestro's iconic profile, symbol of his legendary mark on the world of cinema.

Homo Sapiens Lava Bronze

This is a pen that artfully combines history, innovation and elegance. Created from our innovative patented material of volcanic basaltic lava catalyzed with resin, it has a high resistance to heat, shock and corrosion, as well as a smooth and warm feel. Its design features metallic trim inspired by the Bronze Age, the era in which the first writing systems were invented. The Visconti Homo Sapiens pen is a tribute to the evolution of humanity and writing, and a masterpiece of Italian craftsmanship.

Homo Sapiens Lava Dark Age

Prehistoric man molded obsidian tools from lava for his survival and we at Visconti have created a writing instrument inspired by their genius. This unique combination of Mount Etna basaltic lava and resin is made according to our patented formula, which creates an unbreakable, moisture absorbing, and velvety material that has revolutionized the writing world.

Homo Sapiens Crystal Dream

The Homo Sapiens Crystal Dream is inspired by the world of dreams, where different elements combine to create a unique vision of reality. Though this pen maintains the distinctive features of the Homo Sapiens collection, it also introduces a new concept of elegance, dynamism, and modernity with the combination of transparent crystal windows and a patented double reservoir filling system. It is the only demonstrator with two windows: a large window cut into the pen's barrel to display the bigger reservoir, and a smaller window behind the pen's grip showing the ink stored in the pen's second smaller reservoir.

Divina Elegance

The Divina Elegance collection stands out in great part due to its silver inlays that give it that rare quality of quiet luxury. Constructing the pen is a long and lengthy process because each silver piping has to be inserted manually, one at a time. Though the process is arduous, it transforms the Divina Elegance writing instrument into a unique and refined sensory experience.

Medici

The Visconti Medici collection pays homage to this important dynasty by crafting a collection of luxury pens that embodies the spirit of artistic excellence and elegance that the Medici family represented.

This collection draws on the best of Visconti's historical heritage and DNA, enriching it with valuable new features such as a new demonstrator central ring, made with the skeletonization technique, which features the official emblem of Florence, the lily.

The central ring is just one example of the enhancements made to this historical collection, which is a part of Visconti's heritage. The loading system now features a capacious Power Filler double reservoir and the clip, which was previously laser-engraved, has been replaced with a new enameled version. The pen is made of sandblasted Acrosilk, an innovative material first introduced by Visconti, which consists of a compound of Acrylic resin and Silk fibers.

02 | PEN COLLECTION LIMITED EDITION

Comedia Limited Edition

Following the success of the Comedia collection, Visconti embarks on a new journey through Dante's immortal masterpiece, the Divine Comedy, available in only 999 limited edition pieces - a number rooted in the numerical structures of Dante's poetry.

Among the stand-out features of this collection are the special central ring, engraved and elegantly enamelled with the name of the characters that inspire the pen. The finial, a unique case for a Visconti collection, also features a refined enameling.

With this new limited edition, Visconti continues to honor the literary and artistic heritage of Italy, transforming symbols of human nature into masterful writing instruments that celebrate the power of the written word.

Hitchcock Vertigo

Introducing the Hitchcock Vertigo collection—a limited edition pen inspired by Alfred Hitchcock's psychological thriller, Vertigo. Available in both fountain pen and roller versions, this collection is strictly limited to 958 pieces, a subtle yet meaningful tribute to the film's release year, 1958. This exclusive edition evokes the haunting atmosphere and intricate visual language that have made Vertigo one of the most celebrated works in the history of cinema.

Crafted from vibrant orange resin with rich, dark undertones, the pen's body mirrors the striking color palette of the iconic Vertigo poster designed by the legendary American graphic artist Saul Bass.

Homo Sapiens Lotus Garden

The lotus flower is known in many cultures as a symbol of rebirth, strength, and purity. Its spiritual meaning comes to mind as we imagine this exquisite flower, with its roots latched in mud, submerged every night in river water, miraculously re-blooming the next morning sparklingly clean. The power of creation is in its DNA, just as it is in ours: Homo Sapiens, the Wise Human.

Homo Sapiens Full Demo

With the Homo Sapiens Full Demo, Visconti reinvents its most iconic model, transforming it into a tribute to technical mastery. This is more than a writing instrument—it is a statement of craftsmanship, revealing the hidden beauty of its inner workings. Every internal component has been reimagined to become part of the visual experience, ensuring perfect transparency and an immaculate finish even within the pen's most concealed sections.

Homo Sapiens Carbon Abyssus

The Homo Sapiens Carbon Abyssus marks the evolution of a collection that blends research and style, introducing new shades to forged carbon. Compact fibers intertwine with deep blue reflections reminiscent of the strength of the nocturnal sea, while the lightness of the materials is paired with an essential and contemporary aesthetic, turning every detail into a distinctive sign of design.

Homo Sapiens Dark Sapphire & Dark Emerald

Like gems emerging from darkness, the new Homo Sapiens Dark Sapphire and Dark Emerald collection explores the tension between shadow and light, between the depth of matter and the hidden brilliance of precious stones.

Within their dark resins, crossed by blue or green reflections, the duality of the gems takes shape: the wisdom of sapphire and the rebirth of emerald.

Dreaming Starry Night

Dreaming Starry Night is the crowning achievement of a grand journey spanning more than twenty years, driven by a passion for art, a love for beauty, and a dedication to quality. The design of the collection is inspired by Van Gogh's famous impasto brushstrokes. The barrel and cap are crafted with a lost-wax silver casting. This way, by touching the pen, one can feel the ridges and swirls that characterize Van Gogh's works. On this silver base, an enamel layer is applied, recreating the most famous work of the Dutch painter: The Starry Night. Each pen is meticulously hand-enameled by master artisans to pay homage to Van Gogh's pictorial mastery.

Dreaming Sunflower

The Dreaming Sunflowers collection is a poetic expression of Visconti's long-standing devotion to art and beauty, carried forward for decades through its Van Gogh line. The pen pays tribute to the iconic Sunflowers—a vibrant, life-filled series of paintings, cherished by the Dutch artist for its brilliant colors and flowing forms.

The barrel and cap of Dreaming Sunflowers are crafted from lost-wax microcasted sterling silver, with sculpted surfaces designed to evoke the texture of expressive brushstrokes. On this precious metal base, a carefully applied enamel painting in warm tones of orange, yellow, and green brings the piece to life. Each pen is individually hand-painted, masterfully re-creating the details of Van Gogh's work, making every single pen a one-of-a-kind masterpiece.

Maze

With Maze, Visconti continues its path of pens inspired by the world of games, once again turning the act of writing into an interactive experience that combines aesthetic refinement and playful engagement. The transparent acrylic barrel houses a golden labyrinth, crafted with the highest precision. A small ruby sphere navigates the intricate paths along a journey of challenge and ingenuity until it reaches the central plaza in aged bronze. In the barrel end, a golden sculpture depicts the head of the Minotaur, guardian of the labyrinth and tribute to the legend of Theseus and Ariadne.

Checkmate

A collection that redefines traditional pen design: the first and only pen on which it is possible to play chess. Checkmate pen itself serves as an outstanding miniature chessboard. The pen comes with its special magnetic chess pieces—pawns, bishops, knights, rooks, a Queen, and a King, awaiting your command to bring your chess game to life.

This innovative limited edition is crafted in refined enameled bronze featuring a majestic display box, an 18kt gold nib and our Power Filler Doubler Reservoir filling system. Whether you seek luxury, creativity, or the joy of play, Checkmate turns ordinary moments into extraordinary experiences.

Galileo Galilei

This collection celebrates the life and legacy of one of the world's most influential scientists and intellectuals. Galileo Galilei, born in Pisa, Tuscany, on February 15th, 1564, was a pioneer of scientific inquiry, an astronomer, inventor, philosopher and writer.

In pure Visconti style, this collection combines the baroque aesthetic of the scientific instruments used by Galileo with several homages to his extraordinary technical brilliance. One example above all: the new Galileo Double Filler filling system, tailored by Visconti engineers for this fountain pen.

Nikola Tesla

Visconti continues its journey of celebrating the great innovators and scientists of the past, paying tribute to one of the most visionary minds in history: Nikola Tesla.

A limited edition collection of just 88 pieces, this creation merges art, science, and avant-garde technology. Inventor, physicist, and world-renowned engineer, Tesla revolutionized the very concept of energy, paving the way for alternating current, wireless transmission, and the technologies that define the modern world.

The design of the collection is inspired by Tesla's famous coils—devices capable of generating spectacular plasma discharges resembling lightning bolts.

Year of the Dragon

Inspired by the mythical five-clawed Imperial Dragon, this stunning fountain pen captures the auspicious power of Chinese culture in a body of precious hand-enamelled vermeil silver. The Dragon figure on the pen's body is further accentuated by a finely etched dragon-scale texture visible under a layer of semi-transparent enamel. To emphasize its auspicious power and nobility, Visconti designers decided to further enrich the look of the Imperial Dragon by setting a precious red ruby into its eye.

Alexander the Great

Every year Visconti commemorates a famous character. For 2023, we have chosen to pay tribute to Alexander the Great (356-323 BC) in honor of the 2300th anniversary of his death. Winner of numerous battles and conqueror of many territories, he died in Babylon when he was only 32 years old, but left behind an extraordinary legacy. He founded and re-established numerous cities, among them the biggest of the ancient world, Alexandria in Egypt, the center of the Hellenistic civilization.

He knew how to encourage his people for their excellence in battle in ways that brought out greater excellence. Although he would take away the political autonomy of those he conquered, he would not take away either their cultural heritage or their way of life.

Glass inkwell

The glass inkwell designed by Visconti evokes stability and elegance. This new bottle ensures consistent filling every time. Inside, there's a convenient cylinder designed to collect the necessary amount of ink even when the ink is running low, thus avoiding waste. The large cap, matching the color of the ink, covers the Bakelite cap, which is highly heat-resistant.

04 | MY PEN SYSTEM

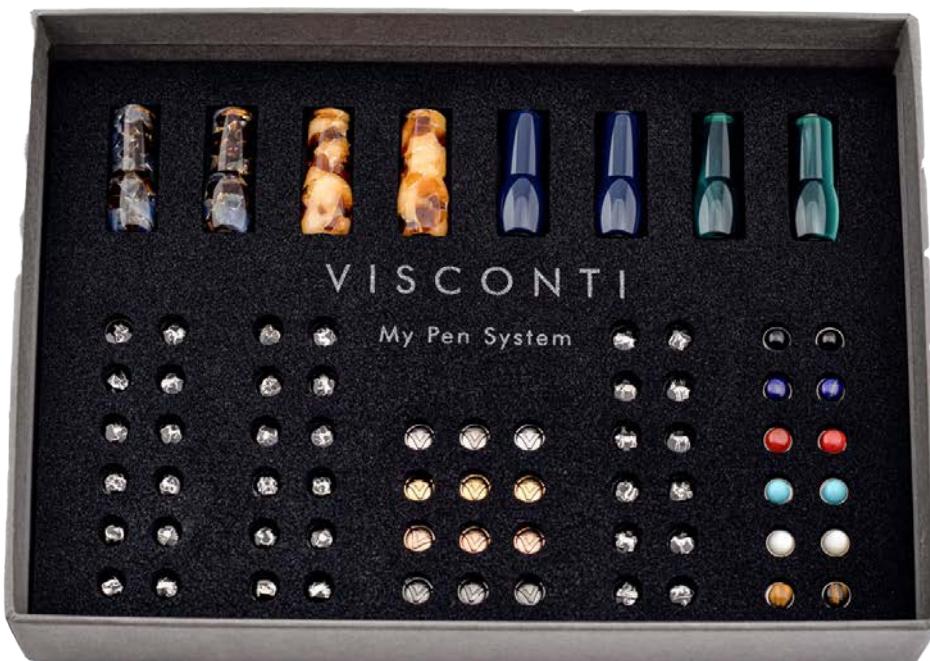

My Pen System

Experience the joy of customization and discover how every little detail can make a difference. Thanks to a magnetic mechanism, the system allows you to replace the Visconti logo, present on the top of the cap or at the base of the pen's barrel with your initials, semi-precious stones or one of the twelve zodiac signs.

A simple gesture allows you to transform your writing instrument into a special and original gift.
