TABLE OF CONTENTS

01 | PEN COLLECTION
REGULAR EDITION

Divina Elegance

The Divina Elegance collection stands out in great part due to its silver inlays that give it that rare quality of quiet luxury. Constructing the pen is a long and lengthy process because each silver piping has to be inserted manually, one at a time. Though the process is arduous, it transforms the Divina Elegance writing instrument into a unique and refined sensory experience.

Divina Elegance Wave

NEW 2023

The power and elegance of the sea is captured by this new Divina Elegance Wave. Waves bring life to the calm ocean. They represent the passage of time, the ways things change while remaining the same and, above all, they bring clarity, regeneration and joy to whomever experiences their energy.

Homo Sapiens Crystal Dream

The Homo Sapiens Crystal Dream is inspired by the world of dreams, where different elements combine to create a unique vision of reality. Though this pen maintains the distinctive features of the Homo Sapiens collection, it also introduces a new concept of elegance, dynamism, and modernity with the combination of transparent crystal windows and a patented double reservoir filling system. It is the only demonstrator with two windows: a large window cut into the pen's barrel to display ink the bigger reservoir, and a smaller window behind the pen's grip showing the ink stored in the pen's second smaller reservoir.

Homo Sapiens Lava Dark Age

Prehistoric man molded obsidian tools from lava for his survival and we at Visconti have created a writing instrument inspired by their genius. This unique combination of Mount Etna basaltic lava and resin is made according to our patented formula, which creates an unbreakable, moisture absorbing, and velvety material that has revolutionized the writing world.

Homo Sapiens Lava Bronze

This is a pen that artfully combines history, innovation and elegance. Created from our innovative patented material of volcanic basaltic lava catalyzed with resin, it has a high resistance to heat, shock and corrosion, as well as a smooth and warm feel. It's design features metallic trim inspired by the Bronze Age, the era in which the first writing systems were invented. The Visconti Homo Sapiens pen is a tribute to the evolution of humanity and writing, and a masterpiece of Italian craftsmanship.

IoPenna

"There is no difference between making a pen, a building, or a city, the underlying problems are the same." These are the words of Gaetano Pesce, renowned architect and designer whose works are displayed in many of the world's major museums. With IoPenna, Pesce created much more than a writing instrument, he designed a piece of modern art. Thanks to its innovative flexible body made of soft resin and ultramodern bright colors, it invites young people to experience the modern art of handwriting. The pen is packaged in a resin box also created by the designer.

Medici

NEW 2023

The Visconti Medici collection pays homage to this important dynasty by crafting a collection of luxury pens that embodies the spirit of artistic excellence and elegance that the Medici family represented.

This collection draws on the best of Visconti's historical heritage and DNA, enriching it with valuable new features such as a new demonstrator central ring, made with the skeletonization technique, which features the official emblem of Florence, the lily.

The central ring is just one example of the enhancements made to this historical collection, which is a part of Visconti's heritage. The loading system now features a capacious Power Filler double reservoir and the clip, which was previously laser-engraved, has been replaced with a new enameled version. The pen is made of sandblasted Acrosilk, an innovative material first introduced by Visconti, which consists of a compound of Acrylic resin and Silk fibers.

Mirage

Marcel Duchamp was a French artist who challenged the conventional notions of art and aesthetics. He once said: "The beauty of the Mirage is that it is not a deception." He meant that a mirage is not a false image, but a real phenomenon that results from the refraction of light in the atmosphere. He admired the mirage for its ability to create unexpected and surprising effects, just like his own artworks. This pen captures Duchamp's vision in its iridescent resins that refract the light passing through it to create a unique writing experience.

Mirage Mythos

Greek mythology teaches that the Olympian gods are immortal beings, governing the life and death of human beings. The personalities we have selected represent different super-natural forces to be inspired by. The collection comes in four colors enhanced with gold powder, corresponding each to a divinity: turquoise for Athena, brown for Apollo, blue for Zeus and purple for Aphrodite. This is a new Mirage, with innovations that distinguish it at first glance from the basic model, such as the large steel nib (yellow gold plated), the central section made of brass instead of resin, most importantly, the central ring, engraved with MYTHOS and a "V" that symbolizes Mount Olympus.

Rembrandt

Visconti has taken inspiration from the famous painter of the XVII century: Rembrandt Harmenszoon van Rijn, the most important artist in Dutch art history. His use of the chiaroscuro technique, theatrical use of light and shadow, and thick paint, give his work an extraordinary sense of space and emotion. This pen design captures the artist's brushwork in carefully selected colorful resins that give each pen its unique appearance.

Rembrandt-S

This collection again pays tribute to Rembrandt, the icon of the Dutch Golden Age of art, with three new colors - blue, bordeaux and black. The new metalwork is finished in ruthenium to accentuate the contrast with the colors of the resins.

Van Gogh

Thanks to the technical know-how of our craftsmen, Visconti has created a series of pens dedicated to the artist's most famous paintings, such as Sunflower, Starry night and Portrait. These pens are made of high-quality resin with 18 facets that reflect the colors and textures of Van Gogh's opulent brushstrokes. They come in beautiful boxes illustrated with his paintings and include special inks that match the pen's color and bookmarks that feature the work of art. Visconti Van Gogh pens are not only writing instruments, but also works of art that capture the emotion and beauty of the artist's vision.

Alexander the Great

NEW 2023

Every year Visconti commemorates a famous character. For 2023, we have chosen to pay tribute to Alexander the Great (356-323 BC) in honor of the 2300th anniversary of his death. Winner of numerous battles and conqueror of many territories, he died in Babylon when he was only 32 years old, but left behind an extraordinary legacy. He founded and re-established numerous cities, among them the biggest of the ancient world, Alexandria in Egypt, the center of the Hellenistic civilization.

He knew how to encourage his people for their excellence in battle in ways that brought out greater excellence. Although he would take away the political autonomy of those he conquered, he would not take away either their cultural heritage or their way of life.

Homo Sapiens Arizona Sunset

The state of Arizona is rich in evocative landscape and natural resources. It is home to the imposing Grand Canyon, one of the Seven Natural Wonders of the World. Our craftsmen took the variety of colours that paint the canyon walls at sunset as inspiration to painstakingly recreate a harmony of warm and amber hues in acrylic resin on the cap and barrel of the pen.

Homo Sapiens Lotus Garden

The lotus flower is known in many cultures as a symbol of rebirth, strength, and purity. Its spiritual meaning comes to mind as we imagine this exquisite flower, with its roots latched in mud, submerged every night in river water, miraculously re-blooming the next morning sparklingly clean. The power of creation is in its DNA, just as it is in ours: Homo Sapiens, the Wise Human.

Homo Sapiens Tuscan Hills

The Homo Sapiens Tuscan Hills collection celebrates the beauty and harmony of the tuscan countryside. The pen's shape took its inspiration from the gentle slopes of wheat fields. The green and brown veins of its body capture the chromatic variety of our landscapes.

Looking East

NEW 2023

Much like the finely crafted gilded window latticework of old, this pen transcends beyond its value as an elegant and refined writing instrument, rising to become a symbol of the spiritual and economic standing of its owner. More than just a writing tool, the "Looking East" collection is a testament to the rich heritage of Asian design and the profound connection between architecture, identity, and craftsmanship.

Opera Master Savanna

The savannah landscape changes with the passing of seasons. The predominantly yellow shades of the dry season shift into thousands of brown hues, typical of the rainy season. Opera Master Savanna unites the two souls of this extraordinary land by incorporating the same colour gradients in the barrel and the cap.

Skeleton

NEW 2023

This iconic design pays tribute to Visconti's long history of skilled craftsmanship as well as the beauty of the skeletonisation technique. Our Skeleton is not only a must-have piece in a Visconti enthusiast's collection, but also an outstanding writing instrument designed for the most discerning customers.

Qwerty

The Qwerty collection is inspired by the alphanumeric keyboard patented in 1864 by Christopher Sholes. This pen pays homage to a timeless system, born with typewriters, but still present in our daily lives.

Year of the Dragon

Inspired by the mythical five-clawed Imperial Dragon, this stunning fountain pen captures the auspicious power of Chinese culture in a body of precious hand-enameled vermeil silver. The Dragon figure on the pen's body is further accentuated by a finely etched dragon-scale texture visible under a layer of semi-transparent enamel. To emphasize its auspicious power and nobility, Visconti designers decided to further enrich the look of the Imperial Dragon by setting a precious red ruby into its eye.
