# TIP TECHNOLOGIES

Cross luxury writing instruments are available in a wide variety of tips to suit many consumers' needs.

Depending on the item, the tip technologies available are:

## FOUNTAIN PEN

- One of the oldest styles of writing instruments, fountain pen nibs actually adapt to your own personal grip and writing style over time, creating lines on the page that — like your signature — are all your own. Ink flows by capillary action from an ink reservoir to the fountain pen nib, which is the delicate split metal mechanism that contacts the paper. A favourite of the true connoisseur, fountain pens are each a work of art in their own right.
- Cross offers nibs in two widths: Medium & Fine
- Five different materials
- Cross Fountain Pens support two different feed systems:
- Cartridge, or a replaceable capsule full of ink, which is inserted into the neck of the nib.
- Converter, which allows the writer to load liquid bottled ink and insert it into the writing instrument.

## BALLPOINT PEN

- The Ballpoint is the most popular tip technology and in many ways the simplest. A Ballpoint Pen uses a small rotating ball made of carbide to disperse ink as you write. This ball acts as a buffer between the material you're writing on and the ink inside the pen. The ball rotates freely and rolls out the ink as it is continuously fed from the ink reservoir.

- Ballpoint Pens are not capped, but instead retract and store via a rotating mechanism in the barrel.
- Low maintenance and easily refillable, the Ballpoint Pen is the option for the everyday pen user.

## PENCIL

- Cross mechanized pencils are offered in many Century finishes. The size of the mechanical pencil's line is 0.7 mm, which is determined by the width of the lead.
- For the traditionalist as well as professionals in drafting and drawing fields, Cross Pencils offer fine quality and a Lifetime Mechanical Guarantee.

## SELECTIP® ROLLERBALL

- Our most versatile tip technology is proprietary to Cross, and is known as Selectip Rollerball. A Selectip allows you to "select" the kind of refill you want to use in this writing instrument from the following options:
- Gel Rollerball (a mix of Ballpoint ease of use and the elegance of Fountain Pen ink-flow)
- Jumbo Ballpoint (Ballpoint technology with a bolder, fuller write-out)
- Porous-Point (most commonly known as a Flair or Marker Point)
- The inks in a rollerball are generally aqueous based. This results in a smoother, fluid (or wet) lay-down of ink similar to a Fountain Pen. Aqueous

based inks, due to their fine fluidity, also tend to dry out quicker, thus care must be taken to always cap, or retract, Selectip pens between uses.

- Unlike Ballpoint Pens, most Selectip Pens have a separate cap which prevents the ink from drying during storage.

## GEL INK PEN

- The tip technology of gel ink has been rapidly gaining popularity over the past few years, and Cross now has several retractable gel ink writing instruments.
- Gel inks are generally aqueous based. This results in a smoother, fluid (or wet) lay-down of ink similar to a Fountain Pen.
- Aqueous-based inks, due to their fine fluidity, also tend to dry out quicker, thus care must be taken to always retract the tip after use.

# EXCLUSIVE CROSS FINISHES

Cross offers a variety of precious metals in our Classic Century, Century II, Townsend, and Peerless product lines. These collections are made from the finest and most precious metals on earth. From Sterling Silver to Platinum Plate to 10CT Gold Filled, 14CT Gold Filled, and Solid 18CT Gold, these items have long served as the hallmark of Cross craftsmanship, beauty, and renowned quality. Some points of differentiation in the Precious Metals Collection:

## STERLING SILVER

Sterling silver must contain 92.5% silver. The balance can be any other material, but is mostly copper for increased durability. These pens have a softer feel to them, and carry an elegance that grows with age.

## PLATINUM PLATE

A contemporary update to the 100-year-old technique of electroplating, the use of platinum provides a clean, universal shine that is unmatched in any other precious metal. Perhaps the most in-demand of the precious metals collection, platinum offers elegance, style, and versatility.

## SOLID 18CT GOLD

Our stunning 18CT gold offerings are 75% pure gold. A much softer metal than the other gold offerings in our line, its shade is the gold most commonly associated with the metal itself. Notable by a single black lacquer band around the top of the cap in our Century line. The 18CT offerings mark the finest in quality and are true heirlooms. The cap and barrel of the pens are 100% 18CT gold. While the content of the gold itself is not pure gold in our 18CT offerings, the pen shells are made of 18CT gold.

## GOLD FILLED OR ROLLED GOLD

Also called gold overlay. A layer of either 10CT, 14CT, or 18CT gold is permanently bonded by heat and pressure to the surface of a support metal, then rolled or drawn to a prescribed thickness. The result is a higher gold content than would be achievable through gold plating, and due to the strength of the metal to which it is bonded, is actually stronger than solid gold. Gold filled provides the look and feel of solid gold, but without the natural softness and sensitivity of this precious metal.

## SWAROVSKI® CRYSTAL

Select Cross collectible writing instruments are crowned with a brilliant Swarovski crystal in the cap.

# ENGRAVING SERVICES
