01 | PEN COLLECTION REGULAR EDITION

Divina Elegance

The Divina Elegance collection stands out in great part due to its silver inlays that give it that rare quality of quiet luxury. Constructing the pen is a long and lengthy process because each silver piping has to be inserted manually, one at a time. Though the process is arduous, it transforms the Divina Elegance writing instrument into a unique and refined sensory experience.

Eco-Logic

At Visconti, we understand the need to constantly search for eco-friendly and renewable materials as well as improve our production processes to be more respectful of the environment. The Eco- logic collection was born from the combination of these ideas and our creativity and experience. It is a pen made from bioplastic obtained from hemp plants, a non-polluting material that is very durable.

Homo Sapiens Crystal Dream

The Homo Sapiens Crystal Dream is inspired by the world of dreams, where different elements combine to create a unique vision of reality. Though this pen maintains the distinctive features of the Homo Sapiens collection, it also introduces a new concept of elegance, dynamism, and modernity with the combination of transparent crystal windows and a patented double reservoir filling system. It is the only demonstrator with two windows: a large window cut into the pen's barrel to display ink the bigger reservoir, and a smaller window behind the pen's grip showing the ink stored in the pen's second smaller reservoir.

Homo Sapiens Lava Dark Age

Prehistoric man molded obsidian tools from lava for his survival and we at Visconti have created a writing instrument inspired by their genius. This unique combination of Mount Etna basaltic lava and resin is made according to our patented formula, which creates an unbreakable, moisture absorbing, and velvety material that has revolutionized the writing world.

Brilliant, transparent and radiant, gemstones inspired us to create the Homo Sapiens Demo Stones collection. The beauty and allure of the most sought-after colored gems: Emeralds for their deep greens, sapphires for their dark blues and rubies for intense reds, can now be a part of your luxury writing experience.

PACKAGINGREGULAR GIFT BOXMODELVISCONTI 12DIMENSIONSSIZE 205X125X60MM; WEIGHT 360GRINCLUDEDVISCONTI WARRANTY BOOKLET

This is a pen that artfully combines history, innovation and elegance. Created from our innovative patented material of volcanic basaltic lava catalyzed with resin, it has a high resistance to heat, shock and corrosion, as well as a smooth and warm feel. It's design features metallic trim inspired by the Bronze Age, the era in which the first writing systems were invented. The Visconti Homo Sapiens pen is a tribute to the evolution of humanity and writing, and a masterpiece of Italian craftsmanship.

Homo Sapiens Lava Color

Colors have always been a distinctive feature of Visconti's collections. Homo Sapiens Lava Color comes in three nature-inspired colors: Ash White, Terra di Siena and Tuff - a type of rock made of volcanic ash.

loPenna

"There is no difference between making a pen, a building, or a city, the underlying problems are the same." These are the words of Gaetano Pesce, renowned architect and designer whose works are displayed in many of the world's major museums. With IoPenna, Pesce created much more than a writing instrument, he designed a piece of modern art. Thanks to its innovative flexible body made of soft resin and ultramodern bright colors, it invites young people to experience the modern art of handwriting. The pen is packaged in a resin box also created by the designer.

Medici

The Medici collection is dedicated to one of the most important and powerful Italian dynasties that led the Florentine Golden Age. The pen's shape was designed following the principles of the golden ratio. Its material, a combination of resin and silk fibre, is reminiscent of the exquisite Florentine stone mosaics found in many of the Medici villas.

Mirage

Marcel Duchamp was a French artist who challenged the conventional notions of art and aesthetics. He once said: "The beauty of the Mirage is that it is not a deception." He meant that a mirage is not a false image, but a real phenomenon that results from the refraction of light in the atmosphere. He admired the mirage for its ability to create unexpected and surprising effects, just like his own artworks. This pen captures Duchamp's vision in its iridescent resins that refract the light passing through it to create a unique writing experience.

Mirage Mythos

Greek mythology teaches that the Olympian gods are immortal beings, governing the life and death of human beings. The three personalities we have selected represent three different supernatural forces to be inspired by: Apollo, god of the arts, music, poetry and science, his symbols are the sun, the lyre, the bow and arrow. Zeus, King of the gods and ruler of Mount Olympus, the thunderbolt is his symbol for excellence. Aphrodite, goddess of love and beauty, her symbols are the dove and the sparrow. The collection comes in three new colors enhanced with gold powder, corresponding each to a divinity: brown for Apollo, blue for Zeus and purple for Aphrodite. This is a new Mirage, with innovations that distinguish it at first glance from the basic model, such as the large steel nib (yellow gold plated), the central section made of brass instead of resin, most importantly, the central ring, engraved with MYTHOS and a "V" that symbolizes Mount Olympus.

Opera Gold

Opera Gold is a collection that embodies the spirit of lyric opera. It is a tribute to those masters such as Verdi, Puccini, Mozart and Rossini, whose works of storytelling and musical genius still resonate today with audiences around the world thanks to their flair, brilliance and imagination. An Opera Gold pen is an invitation to recall that greatness always has to begin with someone somewhere.

Rembrandt

Visconti has taken inspiration from the famous painter of the XVII century: Rembrandt Harmenszoon van Rijn, the most important artist in Dutch art history. His use of the chiaroscuro technique, theatrical use of light and shadow, and thick paint, give his work an extraordinary sense of space and emotion. This pen design captures the artist's brushwork in carefully selected colorful resins that give each pen its unique appearance.

Rembrandt-S

This collection again pays tribute to Rembrandt, the icon of the Dutch Golden Age of art, with three new colors - blue, bordeaux and black. The new metalwork is finished in ruthenium to accentuate the contrast with the colors of the resins.

Van Gogh

Thanks to the technical know-how of our craftsmen, Visconti has created a series of pens dedicated to the artist's most famous paintings, such as Sunflower, Starry night and Portrait. These pens are made of high-quality resin with 18 facets that reflect the colors and textures of Van Gogh's opulent brushstrokes. They come in beautiful boxes illustrated with his paintings and include special inks that match the pen's color and bookmarks that feature the work of art. Visconti Van Gogh pens are not only writing instruments, but also works of art that capture the emotion and beauty of the artist's vision.

Divina Dario Argento

With over fifty years of career behind him, Dario Argento is recognised worldwide as the Master of thrill, and his movies as unmistakable and precious gems of cinema, imbued with mystery and terror. His art teaches us that reality is deceptive, that life in its depths is quite different from what appears on the surface. Through his eyes we are able to grasp the fascination of darkness, to experience personally the horror of the soul.

Homo Sapiens Arizona Sunset

The state of Arizona is rich in evocative landscape and natural resources. It is home to the imposing Grand Canyon, one of the Seven Natural Wonders of the World. Our craftsmen took the variety of colours that paint the canyon walls at sunset as inspiration to painstakingly recreate a harmony of warm and amber hues in acrylic resin on the cap and barrel of the pen.

Homo Sapiens Lotus Garden

The lotus flower is known in many cultures as a symbol of rebirth, strength, and purity. Its spiritual meaning comes to mind as we imagine this exquisite flower, with its roots latched in mud, submerged every night in river water, miraculously re-blooming the next morning sparklingly clean. The power of creation is in its DNA, just as it is in ours: Homo Sapiens, the Wise Human.

Homo Sapiens Travel Edition Set

Moving, getting away from one's safe harbour, implies contact with the different and discovering places one has never seen before. The fascination of this theme also lies in its ability to reflect human life: life and travel are in fact forms of movement and contain the desire for change, but also for self-discovery.

Homo Sapiens Tuscan Hills

The Homo Sapiens Tuscan Hills collection celebrates the beauty and harmony of the tuscan countryside. The pen's shape took its inspiration from the gentle slopes of wheat fields. The green and brown veins of its body capture the chromatic variety of our land-scapes.

Il Magnifico Egyptian Marble

The II Magnifico Egyptian Marble Collection, dedicated to Lorenzo de Medici, celebrates the most powerful and enthusiastic patron of Renaissance culture in Italy during his reign as ruler of the Florentine Republic. As a patron of the arts, he is best known for his sponsorship of artists such as Botticelli, Leonardo da Vinci, and Michelangelo, who, along with other great Renaissance artists, created outstanding works of both art and science by exploring nature and precious materials.

Opera Master Savanna

The savannah landscape changes with the passing of seasons. The predominantly yellow shades of the dry season shift into thousands of brown hues, typical of the rainy season. Opera Master Savanna unites the two souls of this extraordinary land by incorporating the same colour gradients in the barrel and the cap.

INCLUDED	VISCONTI WARRANTY BOOKLET; PEN IDENTITY CARD

Qwerty

The Qwerty collection is inspired by the alphanumeric keyboard patented in 1864 by Christopher Sholes. This pen pays homage to a timeless system, born with typewriters, but still present in our daily lives.
